The screenshot displays the Postman application interface. At the top, there's a navigation bar with 'Home', 'Workspaces', 'API Network', and 'Explore'. A search bar labeled 'Search Postman' is present. Below this, the 'My Workspace' section shows a 'New' button and an 'Import' button. The main workspace area is divided into two panes. The left pane shows a 'Collections' sidebar with a 'New Collection' button. The right pane shows a REST client request configuration. The request is a GET method to the URL 'http://127.0.0.1:8000/books/'. The 'Authorization' tab is selected, showing an 'API Key' type with a 'Key' field. The 'Body' tab is also visible. Below the request configuration, the 'Test Results' section shows a successful response with a status of '200 OK', a response time of '14 ms', and a body size of '570 B'. The response body is displayed in a 'Pretty' JSON format, showing a list of books with details like 'id', 'title', 'description', 'author', and 'price'.

Postman interface showing a REST client request to a books API.

Request URL: `http://127.0.0.1:8000/books/`

Method: `GET`

Authorization: `API Key`

Response (200 OK, 14 ms, 570 B):

```

{
  "count": 2,
  "next": null,
  "previous": null,
  "results": [
    {
      "id": 29,
      "title": "fire",
      "description": "story",
      "author": {
        "username": "manu"
      },
      "price": "900.00"
    },
    {
      "id": 30,
      "title": "heaven",
      "description": "Short story",
    }
  ]
}

```

200 OK

Standard response for successful HTTP requests. The actual response will depend on the request method used. In a GET request, the response will contain an entity corresponding to the requested resource. In a POST request the response will contain an entity describing or containing the result of the action.

```
1  {
2    "id": 29,
3    "title": "fire",
4    "description": "story",
5    "author": {
6      "username": "manu"
7    },
8    "price": "900.00"
9  }
```
